

WG de GRUCHY
 **CONSTRUCTION**

EXCEPTIONAL CRAFTSMANSHIP /
OUTSTANDING RESULTS

WHO WE ARE

Vision + Determination.

WG de Gruchy Construction Ltd was established in 2009 with one goal in mind; to become Auckland's preeminent high-end building company.

Ambitious? Yes.

Achievable? Absolutely.

But first, we had to establish some important foundations:

- Build a team of like-minded, passionate, uncompromising and dedicated foremen, builders and apprentices;
- Establish relationships with subcontractors at the top of their trade; and
- Align ourselves with leading architects to guarantee only the best building solution, no matter how ambitious the dream.

Multiple awards and many years down the track we have, hands down, the best team in the business and exceptional relationships with loyal, talented subcontractors. We have built some of Auckland's most distinguished homes and venues and have forged ourselves a solid reputation within the industry.

Building Excellence.

The Sapphire award is in recognition of outstanding achievement and building excellence in winning three or more regional Supreme Awards.

We are one of only a few builders to have received this award in our region.

2022 AWARDS / REGISTERED MASTER BUILDERS

OUR GUARANTEE

What We Offer.

Willie de Gruchy is personally involved in every construction project undertaken by WG de Gruchy Construction. To ensure you receive the best service and advice possible, Willie will be:

- Involved in all pre-build discussions and costing
- Your first point of contact 24/7
- Project Manager; totally in-tune with the day-to-day operations and continuously driving and fine-tuning each project
- Collaborating on and directing sub-contractor activity with uncompromising expectations
- Enforcing his exacting Quality Control Standards
- Regularly doing what he loves most – working on the tools!

“We want to build ultimate homes and venues for like-minded, passionate clients and architects. This is extremely important to us.

We only take on jobs when the fit is right and I can assure you that if it's been built by the team at WG de Gruchy Construction, it couldn't have been built better!”

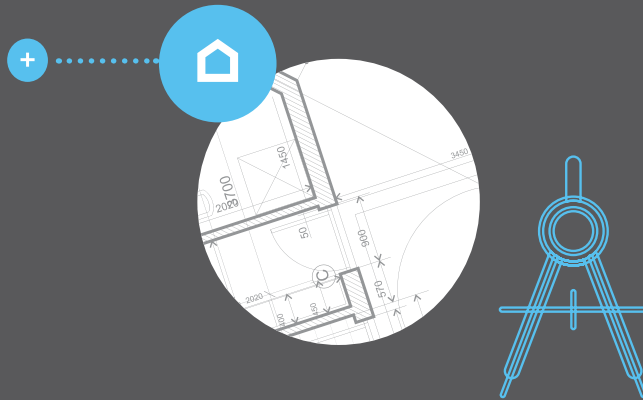

WILLIE DE GRUCHY / MANAGING DIRECTOR

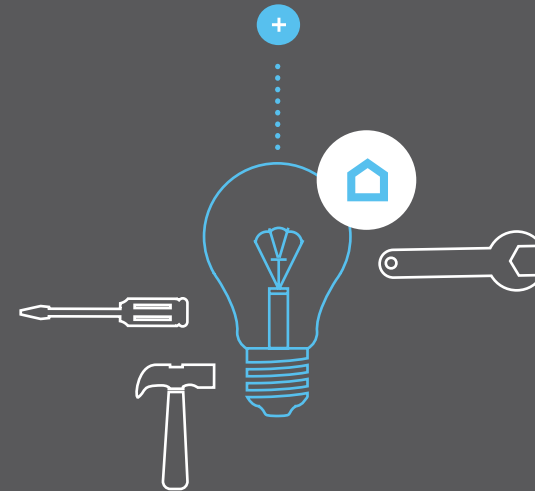

WHAT WE DO

Pre Build

At WG de Gruchy Construction we do some of our best work before we even get hold of a hammer. During this pre-build phase, your building plans are meticulously broken down into the daily tasks – meaning we know who is doing what, and exactly how long each job will take to complete. Task by task, the project is then virtually reconstructed whilst fine tuning the methodology required, ensuring the project runs at optimal efficiency.

Every material, every feature, every nail – we know about it! This detail-oriented process reveals, and eliminates, potential missteps and highlights opportunities for improvement. It minimises costly variations and is why we can be so confident of the end result, which we deliver time and time again. There is no relying solely on formulae and square meter rates here!

Attention to Detail

This cliché phrase is overused and often misused; but at WG de Gruchy Construction we live by it. We pride ourselves on the details: our unmatched professionalism, our culture, our appearance, our quality technology and equipment, our extremely high building standards, our immaculate project sites, our extensive knowledge, our sincere communication, and our unrivaled health and safety qualifications.

Communication & Transparency

We are builders. As such, we have discovered that building confidence and trust is of as much importance as building structures. A huge part of this is being 100% transparent and allowing a quick, easy flow of communication.

Overtime we have developed meticulous, customisable systems and spreadsheets to track the progress of our projects, including all material and subcontractor costings, labour, retentions, variations and payment claims. All of this is available for you to see at any stage.

Our direct lines of communication, email and mobile, are open 24/7 and you can expect prompt, informative, forthright answers to any queries throughout the project.

Post Build Dedication

We know that our clients are going to be blown away by our finished product. However, we don't just hand over the keys and run. Throughout the few months post handover we are there alongside you to get through those initial teething problems, help with the adjustment to new technology, and resolve the minor unforeseen changes once furnishings go in.

And even further to that, a year after handover we will come back in and rectify any minor defects that have occurred due to the natural movements and settling of materials.

We build trust and confidence, we build ultimate homes and venues and we build long lasting relationships.

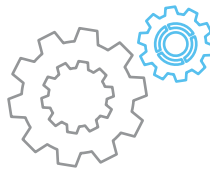

OUR BUILD SYSTEM

01

Build Fit

- Meet clients and architects
- Establish key drivers of the project

02

Build Right

- Iron out methodology
- Detailed cost breakdown
- Identify opportunities for improvement
- Minimise variations
- Increase efficiency; add value
- Establish timeline

03

Build Smart

- Latest Technology
- Quality Equipment and Materials
- Fast Completion
- Highest standards and accuracy
- Build from Ground Up

04

Build Confidence

- Award winning company
- Meticulous tracking systems
- Quality control at every stage
- 100% transparency
- 24/7 direct communication
- Unwaivering in our commitment to achieve the client & design team's ultimate result

05

Build Relationships

- Enjoyable process for client
- Personal guarantee of exceptional finish
- Ongoing support during handover phase and beyond
- 1 year post handover touch up service

**Build Smart. Fast. Better.
Confidence. Reputations.
Trust. Quality. Dreams.
Relationships. Sustainability.
Passion.**
